

Summary of Experience with the Arrow Peru Leadership Programme – midpoint review

Leader: Pablo López

1. How has your experience been up until now?

It has really been an enriching experience, a time where I've been able to receive advice, the Word and very practical materials, likewise I was also able to learn very useful forms of leadership in the ministry, sharing with other people who love God and have the same feeling. It has been a very encouraging time and a great blessing.

2. Which have been your most important learning points?

Time management, keeping priorities in order every day, in the personal, family and ministry aspects. Also teaching about rest. Each topic touched on has been very uplifting and very useful, but perhaps the most applicable to me in these times have been those mentioned.

3. How is Arrow helping you to grow as a leader?

Teaching: in teaching to be able to delve into already known topics, and learn some new topics. Which are being very useful and practical in the development of the ministry in which I am.
Community: time with people, interaction in the class, and sharing within small groups in Arrow has been very productive and a blessing, it is always good to hear how God works in others.
Mentor: personal time with the mentor has been a good time, receiving advice, which is a great blessing and encouragement.

4. How are you putting in practice what you're learning in Arrow?

- Personally, to be able to keep priorities in mind and be organised.
- In the ministry to better distribute planning times, meetings, and special events together with the service team.
- In the family to consider the necessary rest and be more intentional to have those spaces to rest.

5. Any other comments

Grateful to the Arrow ministry and the church for making it possible for me to be part of Arrow's teaching and mentoring. Grateful to God for the opportunity to meet and be blessed with so many people who give of their time and strength to be with us.
